### 1. PTT Dispatcher Station

- 1.1 Interface Instruction
- 1.2 Usage
- 1.3 Missed Calls List
- 1.4. Received Message List
- 1.5 Sent Message List
- 1.6 Message Sent area

### 1. Dispatcher station

Real-PTT Dispatcher station, which is based on multifunctional and visualization dispatching system, It includes private call, group calls, sending message, inviting dynamic group, disconnecting, stuning, monitoring, GPS positioning etc. It can provide timely dispatching function for company. Operation environment of RealPTT Dispatcher station is Windows XP, it is recommended to use 1024 x768 screen resolution.

#### 1.1.Interface instruction

1.1.1. After the user has successfully logged dispatcher station, the system automatically displays the main interface dispatch operations

dispatch station master interface

As shown above, master interface of dispatch station consists of the following components:

- **Toolbar:** It provides "exit", "refresh", "group calls", "call logs", "contacts" and "audios", etc, it can help users to quickly view.
- **Status bar:** It can display the network state of dispatch station, the group info, the name of login in and the speaker info, etc.
- **Group list:** It is on the left side of master interface, it can display all groups and group information.
- **User display area:** It is on the right side of group directory, It can display information and status of group members.
- **Auxiliary display area:** it is right side of user display area, It is mainly assist dispatch station functions display, such as viewing friends, viewing audios, etc.
- **Missed calls list:** It is lower side of the group list, when other users make a private call ,as the dispatch station are on conversation, he can't answer calls.
- **Received message list:** It is on the left of missed call list, It shows all the received info.
- **Sent message list:** It is on the right of received message list, It displays all the information has been sent.
- **Message sent area:** It is on the lower right corner, It can edit the message to be sent.

User status can be displayed by icons, the meaning is as follows:

User online

User status icon: It shows that user is online but not in the current group, so he can't hear current group speech, at the same time he can't speak in the current group.

Users in the group

User status icon: the user is in the currently selected group, he can make calls directly to the group.

Offline status

User status icon: the user is not online, he can't hear speech of current group.

Users in the group

User status of map mode: the user is in the currently selected group, he can make calls directly to the group, It mean this user can directly hear speech of the current group.
